## Step 1: Perplexity Pro

Get perplexity pro account (it is free in India with Airtel customers)

Link: <https://www.perplexity.ai/>

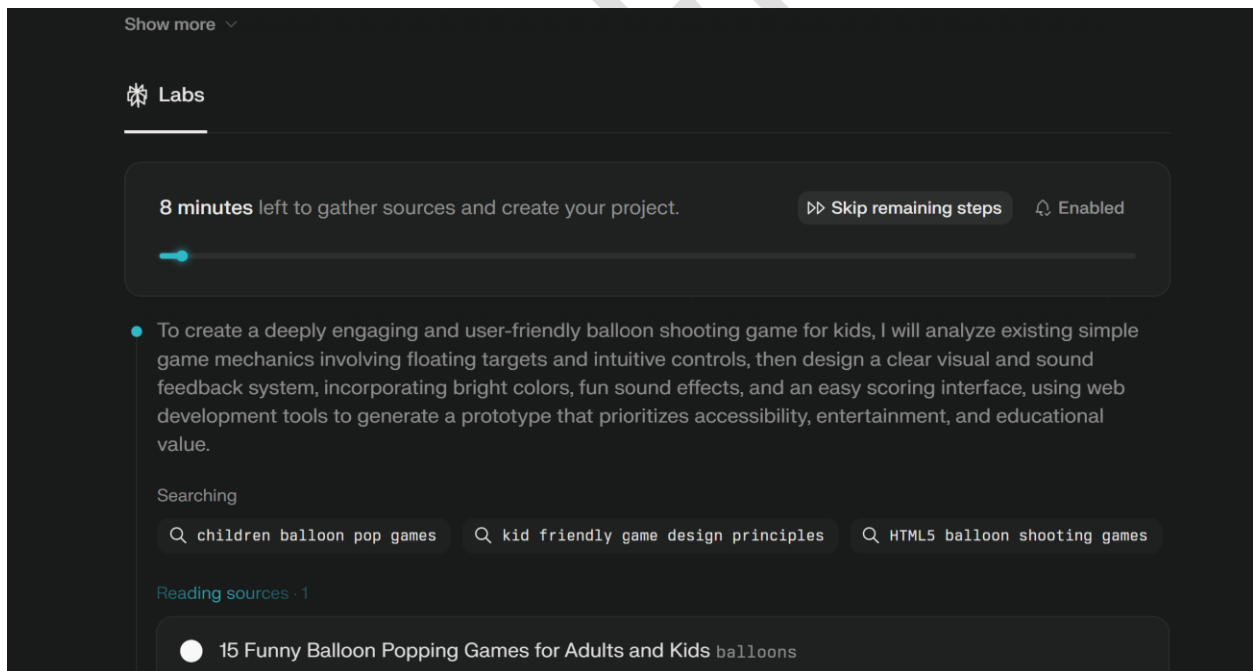

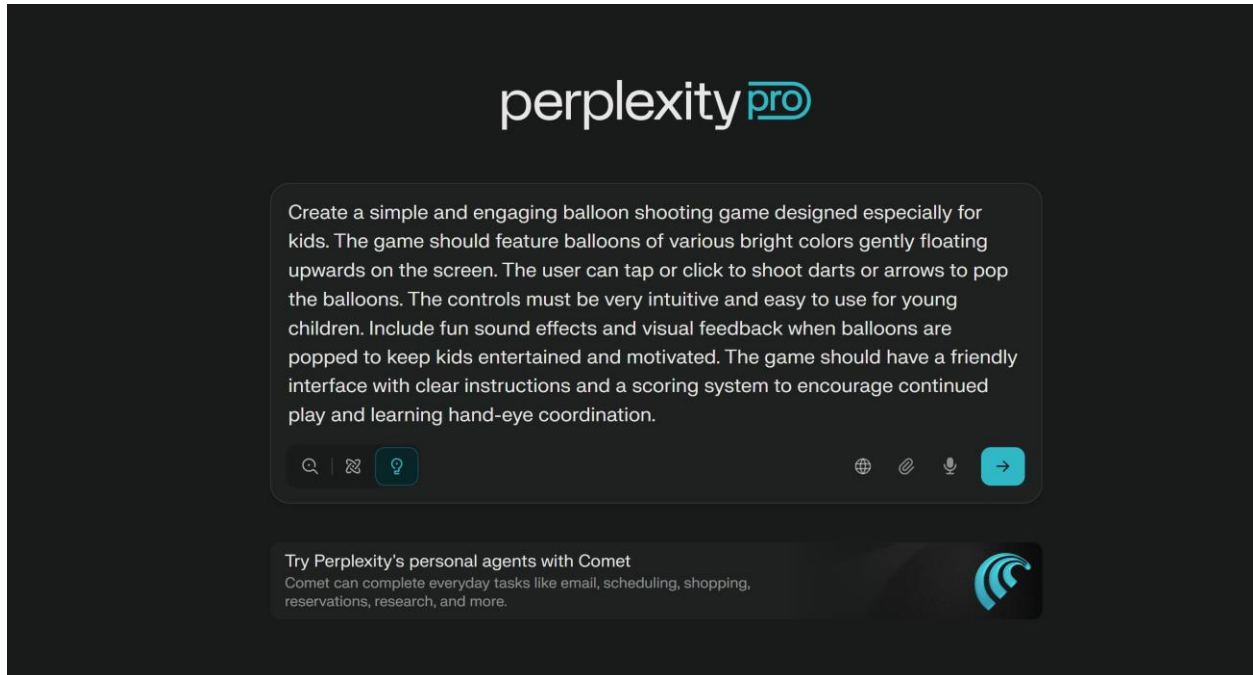

## Step 2: Go to Labs under perplexity pro account

## Step 3: Prompt

Create a simple and engaging balloon shooting game designed especially for kids. The game should feature balloons of various bright colors gently floating upwards on the screen. The user can tap or click to shoot darts or arrows to pop the balloons. The controls must be very intuitive and easy to use for young children. Include fun sound effects and visual feedback when balloons are popped to keep kids entertained and motivated. The game should have a friendly interface with clear instructions and a scoring system to encourage continued play and learning hand-eye coordination.

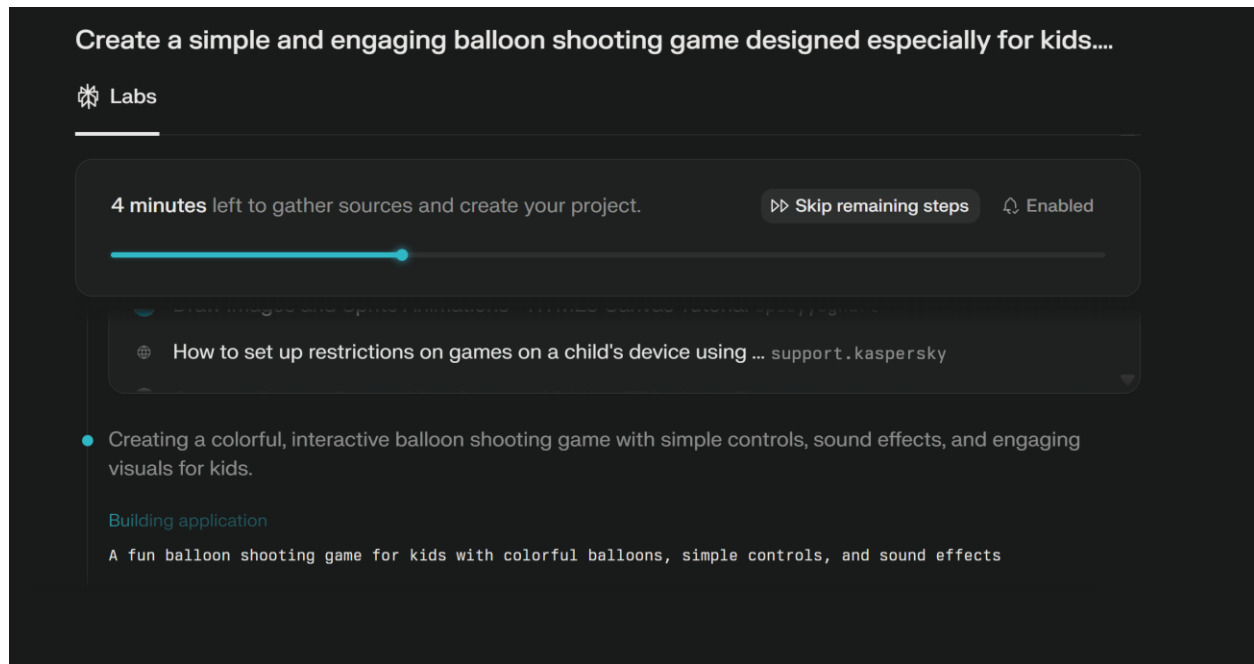

## Step 4: Wait for around 8-10 minutes till it builds the game

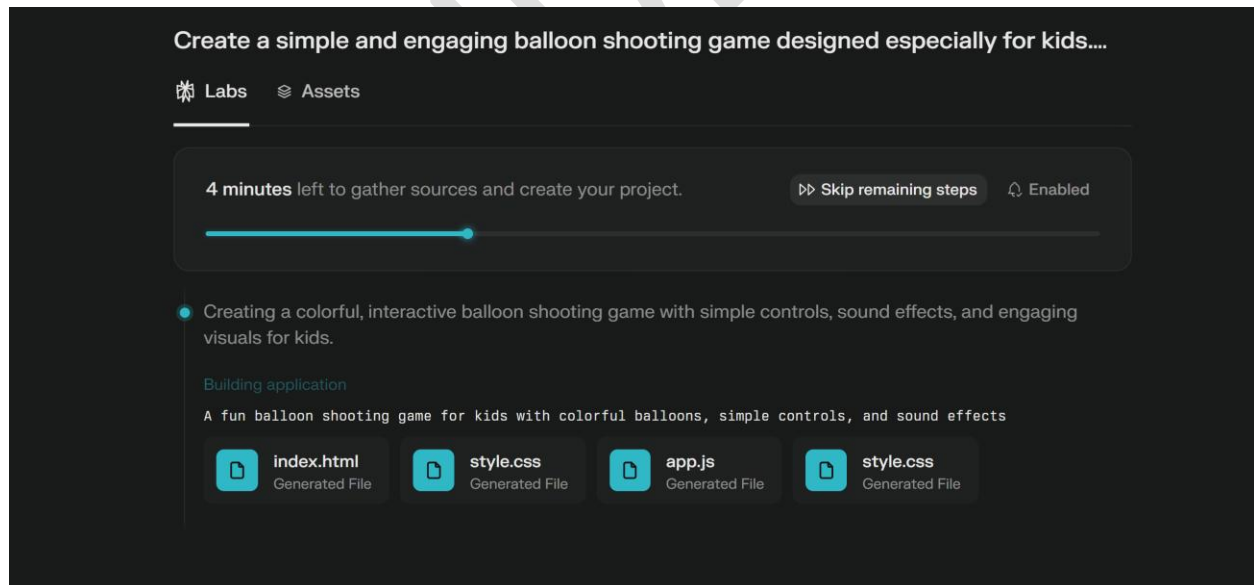

Get a cup of coffee!! ☺

## Step 5: Research

It will start research and look for various options.

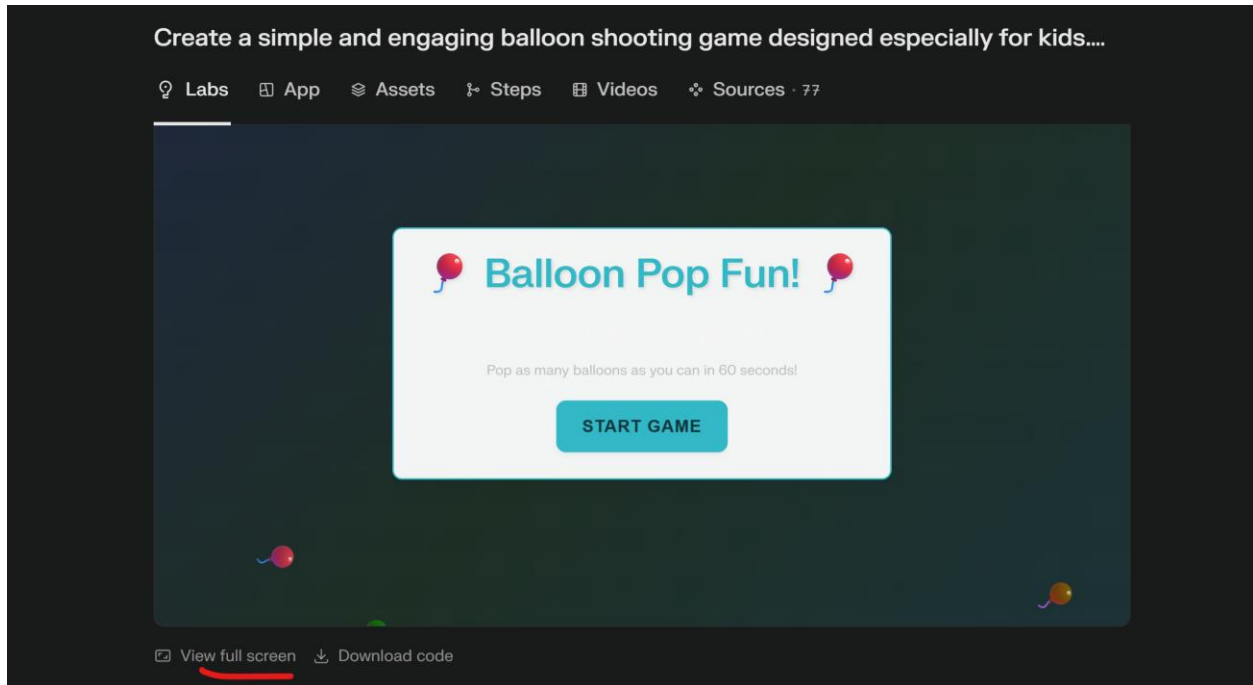

## Building the game

You can even ask it to add more features once the game is generated.

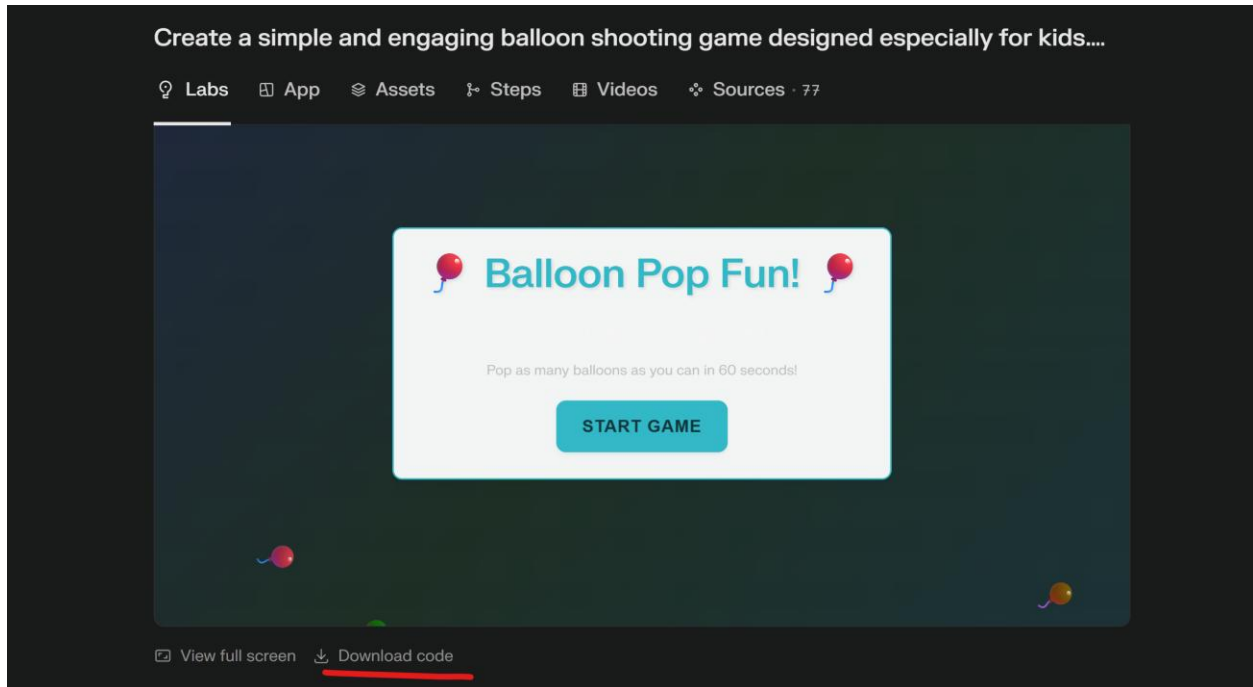

## Step 6: Enjoy the game

You can get the url or view directly from browser to get the game.

## Step 7: Download the code

You can download the assets and entire game if you want to customize and make it better or further give it to a developer.
